

1 ABSTRACT OF THE DISCLOSURE

 A method of controlling a network, which
includes network elements connected via links and
provides services, includes the steps of creating view-
5 configuration information based on network-
configuration information with respect to each of the
services such that the view-configuration information
is related to the network-configuration information,
and displaying a view based on the view-configuration
10 information with respect to each of the services, the
view including both or either one of a physical network
configuration of the network and a logical network
configuration of the network.
